Order N°: 02037

Radio system you'll need :

1420 mm

- ailerons - 2 servos
- elevator
- rudder
- motor

1560 mm

Dualsky 5050EA7

5S LiPo 2,7 - 4Ah

51,8dm²
36,7-44,4 g/dm²

6,5ccm

1,9-2,3kg

NACA 64A014

Není-li uvedeno jinak, všechny neoznačené míry jsou v milimetrech
UNLES STATED, ALL DIMENSIONS ARE IN MILIMETERS

Manufactured by:

UPOZORNĚNÍ!

- Tato stavebnice není hračka a není vhodná pro děti do 14 let.
- Nesprávné použití může způsobit poškození tohoto výrobku nebo zranění.
- Při použití tohoto modelu jste plně zodpovědní za své činy.
- Létejte v bezpečné vzdálenosti od obydlených zón. Před zapnutím rádia se ujistěte, že nikdo jiný nepoužívá stejnou frekvenci jako vy!
- Řiďte se pravidly pro létání v dané zemi.

POZNÁMKY K MONTÁŽI:

- Pokud lepíte díly ze sklolaminátu, tak povrch obruste (zdrsňte), týká se to také vnitřní strany laminátových trupů. Není-li uvedeno jinak, všechny neoznačené míry jsou v milimetrech
- Není-li uvedeno jinak, všechny neoznačené míry jsou v milimetrech
- Odstraňte potahovou folii v místě lepení potaženého dílu.
- Před montáží zkontrolujte otvory v pákách kormidel a pákách serv, popř. upravte jejich velikost.
- Před montáží serv do modelu zkontrolujte funkci serv pomocí servotestru.
- Trup s uříznutou přídí pro montáž elektromotoru má již správné vyosení, motorová přepážka se lepí dovnitř trupu, rovnoběžně s odřezanou částí.
- Křídla některých modelů větroňů mají na koncích úmyslné překroucení, tzv. „negativ“ - odtoková hrana na konci křídla směřuje nahoru.
- Úhly seřízení (úhel křídla, výškovky a vyosení motoru) zkontrolujte pomocí EWD váhy.
- Před prvním startem zkontrolujte, zda nejsou díly modelu zkroucené. Náprava je možná pomocí horkovzdušné pistole.
- Zkontrolujte polohu těžiště a v případě potřeby model dovažte vhodným závažím.
- Zkontrolujte smysl a velikost výchylek kormidel.

ATTENTION!

- This model construction kit is not a toy and is not suitable for children under the age of 14.
- Incorrect use of this model could cause material damage or personal injury.
- You are fully responsible for your actions when you use this model.
- Fly at a safe distance from occupied zones. Before switching on the radio, be sure, that no one else is using the same frequency as you !
- Follow the rules for flying in your country.

NOTES FOR ASSEMBLY:

- Unless stated, all dimensions are in millimeters
- If you are gluing fiberglass parts, sand (roughen) the surface, including the inside of the fiberglass fuselages.
- Always remove the covering foil at the point of gluing the covering part.
- Always insulate electrical cables and connectors with suitable insulation - eg. shrink tubing.
- Before mounting, check the holes in the control horns and servo arms, or adjust their size.
- Before mounting the servos inside the model, check the function of the servos with a servo tester.
- The fuselage with a cut nose for mounting the electric motor already has the correct misalignment. The motor mount must be glued inside the fuselage, parallel to the cut off part.
- Some glider wings have an intentional distortion, the so-called "negative" at the wingtips - the trailing edge at the wingtip points upwards.
- Check the adjustment angles with the incidence meter.
- Before first take-off check up please the center of gravity, the sense and size of the control surface angle and if model aeroplane parts aren't crooked. The reparation is possible through the use of hot-air dryer.
