

## System preventing the contact of cables with the rotating casing of the motor (for AXI 217 /...LONG) Systém zamezující styk kabelů s rotačním pláštěm motoru ( pro AXI 2217/...LONG )

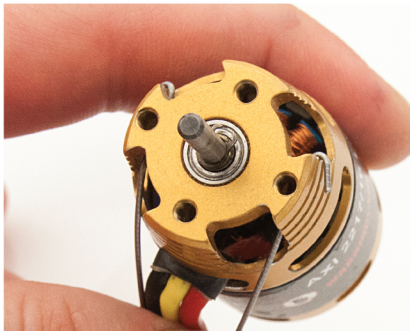

Item No: 020SA2217

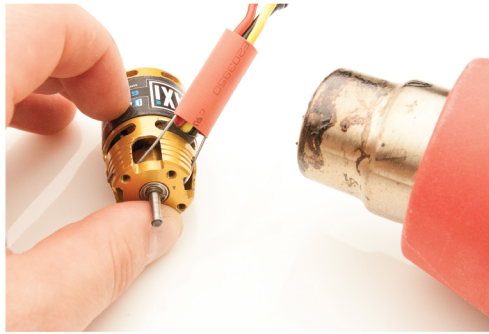

**TOPMODEL CZ**

Vsuňte pružinku do motoru.  
Insert the spring into the motor.

Zahákněte konce pružinky.  
Hook the ends of the spring.

Nasuňte bužírku na pružinku s kabely a horkovzdušnou pistolí smrštěte.  
Slide the tube onto the spring with the cables and shrink with a hot air gun.

Takto to má vypadat. Pružinka odtlačuje kabely od rotačního pláště motoru a zamezuje jejich prodření.  
This is what it should look like. The spring pushes the cables away from the rotating casing and prevents them from abrasion.

Pro snadné vsunutí motoru do trupu si pomozte dvěma kousky závitové tyče.  
Help with two pieces of threaded rods for easy insertion of the motor into the fuselage.
